## For Parents: 5 Questions To Check Out Your School's Health & Safety Policies

---

*Talk with your child's principal, teacher or school nurse about these questions.*

- If my child gets sick or hurt at school, what steps will be followed to help my child?
- If my child is prescribed a medication that must be taken during the school day, how do I arrange for administration and safe storage of the medication?
- If there is an emergency at the school or in its neighborhood, what procedures are in place to protect the school community and how will parents learn of these actions?
- How can my child and I find out what the school cafeteria is serving for lunch and how can I be sure that the lunches are nutritious?
- What opportunities will my child have for physical activity during the school day?
